Pragmatic and results-driven Senior Software Engineer with over 9+ years of continuous experience in architecting high-performance digital products, complex data-heavy frontends, and scalable full-stack ecosystems. Expert in building fast, reliable user interfaces using Vanilla JavaScript and lightweight frameworks, ensuring maximum data precision and rendering speed. Strong track record of translating complex business requirements into intuitive UI/UX components, optimizing data pipelines, and deploying robust cloud backends.

📁 PROFESSIONAL EXPERIENCE

04/2017 – Present

Senior Web & Mobile Engineer, Infomedia DOO [🔗](#)

- **Data Architecture & Analytics:** Engineered custom tracking mechanisms, complex data pipelines, and integrated Google Analytics, Google Ads, and Meta Events to optimize high-scale performance funnels.
- **Frontend Performance & Optimization:** Formulated and structured frontend ecosystems using lightweight, compilation-free libraries (Alpine.js, Vanilla JS). Delivered custom UI components and clean, semantic HTML5/CSS3, maximizing Core Web Vitals and interface reliability.
- **Systems Engineering & Automation:** Developed and centralized internal company systems and enterprise CMS platforms, automating production workflows and driving continuous deployment of high-impact features.
- **Payment & API Integrations:** Successfully implemented Stripe and localized payment gateways, securely managing complex API communications and multi-step checkout flows.
- **Full-Stack Synchronization & Legacy Migration:** Successfully engineered full-stack synchronizations and structured data migrations from legacy architectures to modern, scalable cloud environments, ensuring zero data loss and minimal downtime.

05/2025 – 07/2026

Mobile & Android Engineer, Vebotek OÜ [🔗](#)

- Engineered, tested, and successfully launched multiple custom cross-platform applications to the Google Play [🔗](#) Store, managing the full product lifecycle from initial code to production.
- Built and deployed a custom high-performance web scraper to API converter using Go (Golang) for dynamic content delivery for mobile users.

10/2019 – 07/2025

Web and Mobile developer, Media Buy Services

- End-to-End Product Delivery: Engineered, tested, and successfully published native Android and cross-platform mobile applications from scratch utilizing Flutter and Dart.
- Monetization & Engagement: Implemented complex Google Play Billing systems for in-app purchases/subscriptions and managed advanced user engagement funnels using OneSignal for push notifications.
- Backend & Cloud Infrastructure: Handled secure user authentication via Firebase Auth, deployed Pocketbase for real-time data tracking, and designed automated web scrapers and REST APIs using Go (Golang) and Node.js.
- Release Management: Fully managed production rollout cycles and deployment logistics on the Google Play Store  console.

CORE SKILLS

Frontend Architecture — Modern: Alpine.js, React.js, Plain JavaScript (ES6+), Tailwind CSS, HTMX **Legacy:** HTML5, CSS3, SCSS, jQuery, Bootstrap • **Mobile Development** — Flutter, Dart, Google Play Store Publishing, Google's Bubblewrap for PWA/TWA • **Backend & Cloud** — Pocketbase, Supabase, PostgreSQL, Go (Golang), PHP (Laravel basics), Node.js/Express • **Integrations & AI** — Stripe API, Localization Payment Gateways, REST APIs, Gemini API integrations, Claude Skills, MCP servers

SELECTED INDEPENDENT PROJECTS

Conexa , Lead Product Engineer & UI/UX Designer

End-to-End Delivery: Independently conceived, designed, and fully developed the user experience and frontend layout, creating a pixel-perfect, highly responsive and optimized web presence.

NutriFlow, AI-Driven Full Stack PWA & Mobile App , Full-Stack Developer

- Tech Stack: **Frontend:** React/TypeScript, Vite, Tailwind CSS; **Backend:** Node.js/Express, Google GenAI SDK, Supabase, Bubblewrap CLI, Google Cloud
- Engineered a full-stack, cross-platform mobile application. Integrated real-time database management and authentication via Supabase, and engineered AI-driven automated nutrition logging features using advanced LLM prompts.

E-Commerce Auto Parts Shop , Full-Stack Developer

- Tech Stack: **Frontend:** Next.js, Tailwind CSS, Axios; **Backend:** Node.js, TypeScript, Fastify, PostgreSQL, Prisma;
- Architected a comprehensive, high-scale full-stack e-commerce system optimized for massive relational inventory queries, featuring a fast frontend experience.

FORMAL EDUCATION

2015
Banja Luka

Engineer's degree, University of Banja Luka
Agricultural Economics and rural development
